

Nishika

B.Tech Computer Science Undergraduate

nishikaofficial07@gmail.com | +91 9259292664 | LinkedIn | GitHub | Portfolio

SUMMARY

Second-year Computer Science undergraduate with experience in software development, machine learning, and web technologies. Built projects involving predictive analytics, data processing, and full-stack web development across the development lifecycle. Contributed to mentoring, student-led initiatives, and research activities.

EDUCATION

Jaypee Institute of Information Technology

B.Tech in Computer Science & Engineering | CGPA: 8.11 / 10

Noida, India
Aug 2024 – Present

Delhi Public School

PCM | 96.2%

Hapur, India
May 2024

SKILLS

- **Languages:** C++, JavaScript, Python, C
- **Frontend:** React, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Flask, REST APIs
- **Databases:** MySQL, Firebase Firestore
- **Tools & Practices:** Git, GitHub, OOP, DBMS, Data Structures & Algorithms

EXPERIENCE

Team Computers Pvt Ltd

Software Development Intern

Noida, India
Jun 2026 – Aug 2026

- Built component-based web applications using React, Tailwind CSS, JavaScript, and Firebase Firestore, while gaining exposure to backend development with Node.js, Express, and REST APIs.
- Worked in a collaborative development environment using Git, code reviews, and iterative feedback.

IEEE Student Branch IIIT – TechBlocks

Mentor / Volunteer

Noida, India
Jan 2025

- Selected as a mentor through a competitive interview process to guide **92+ first-year students** in a 5-day technical bootcamp, conducting hands-on sessions on CSS and Tailwind CSS fundamentals.
- Actively contributed to event logistics, participant outreach, and public relations, including cross-campus networking and program promotion across multiple initiatives.

PROJECTS

EcoWell – AQI Prediction Platform

Python, Scikit-learn, Pandas, REST APIs, HTML/CSS/JS | GitHub

- Built an end-to-end AQI prediction pipeline: web scraping → data cleaning (KNN imputation, feature engineering) → model training, achieving **76% accuracy** on real-world environmental data.
- Developed a responsive frontend for AQI trends, analytics, and policy insights; worked with real-time AQI data sources for live environmental monitoring.

Financify – Expense Tracker

React, Tailwind CSS, Firebase Firestore, Node.js, Git | GitHub

(Ongoing)

- Built a full-stack personal finance application with reusable React components, centralized state management, and complete CRUD functionality for income and expense tracking.
- Designed and integrated RESTful APIs using Node.js and Express, streamlining frontend-backend communication through a modular architecture and efficient request handling.

ACHIEVEMENTS & CERTIFICATIONS

- **IEEE SB IIIT – 1st Student Conference Research Forum (SRF 2026)**
Abstract on Cryptography selected for poster presentation at IEEE SB IIIT's inaugural research conference.
- **Data Structures & Algorithms – Coding Blocks**
Completed structured DSA course covering complexity analysis, recursion, and problem-solving patterns.
